

○ Notice on Pediatric Emergency Care (Changed as of April 2023)

Medical care for after-hours emergency pediatric walk-ins is provided within the hours below:

- weekday nights (required to check-in between 19:00-21:30)
- Saturdays/ Sundays/ national holidays/ year's end/ New Year holidays (required to check-in between 18:00-21:30)

The Shinjuku Nighttime Children's Treatment Room will provide medical care within these hours.

Please note that we do not provide first-aid treatment to emergency pediatric walk-ins outside these hours even if you come directly to our hospital.

(We do accept critical pediatric cases brought by ambulance)

For patients who currently receive outpatient care at our pediatric department, an on-call pediatric doctor will provide care. However, on-call doctors do not stay in the hospital on weekends, national holidays, and after-hours. This means that we cannot provide urgent care on the spot, and you may have to wait until the doctor arrives.

If you wish to seek help, please be sure to call us at 03-3202-7181 before visiting.

We appreciate your understanding and cooperation.
